If computers puzzle you,

A computer's potential is almost without limits. Properly used, it can lead to better business decision making and notable increases in productivity.

But, to effectively use a computer, you must first become familiar with its many capabilities and what it can do for you and your enterprise. That's where your Chartered Accountant can help.

These days, CAs are well tuned in to the changing world of information technology. They can assess your company's needs and identify the practical options available to you. They can help you make a smooth transition from manual to computerized accounting and financial information systems.
